Citadel	Scott Logic
Cloud9	Thomson Reuters
CMG	TP ICAP
Deutsche Bank	Trading Screen
FactSet	TRowe Price
FinTech Studios	Trumid
Genesis Global	UBS
GreenKey	Wellington
ISH Markit	Wells Fargo
JP Morgan	Westpac

Agenda

- Breakout Working Groups
 - App Directory
 - Intents
- GreenKey Demo
- Savanet Contribution Proposal

App Directory WG

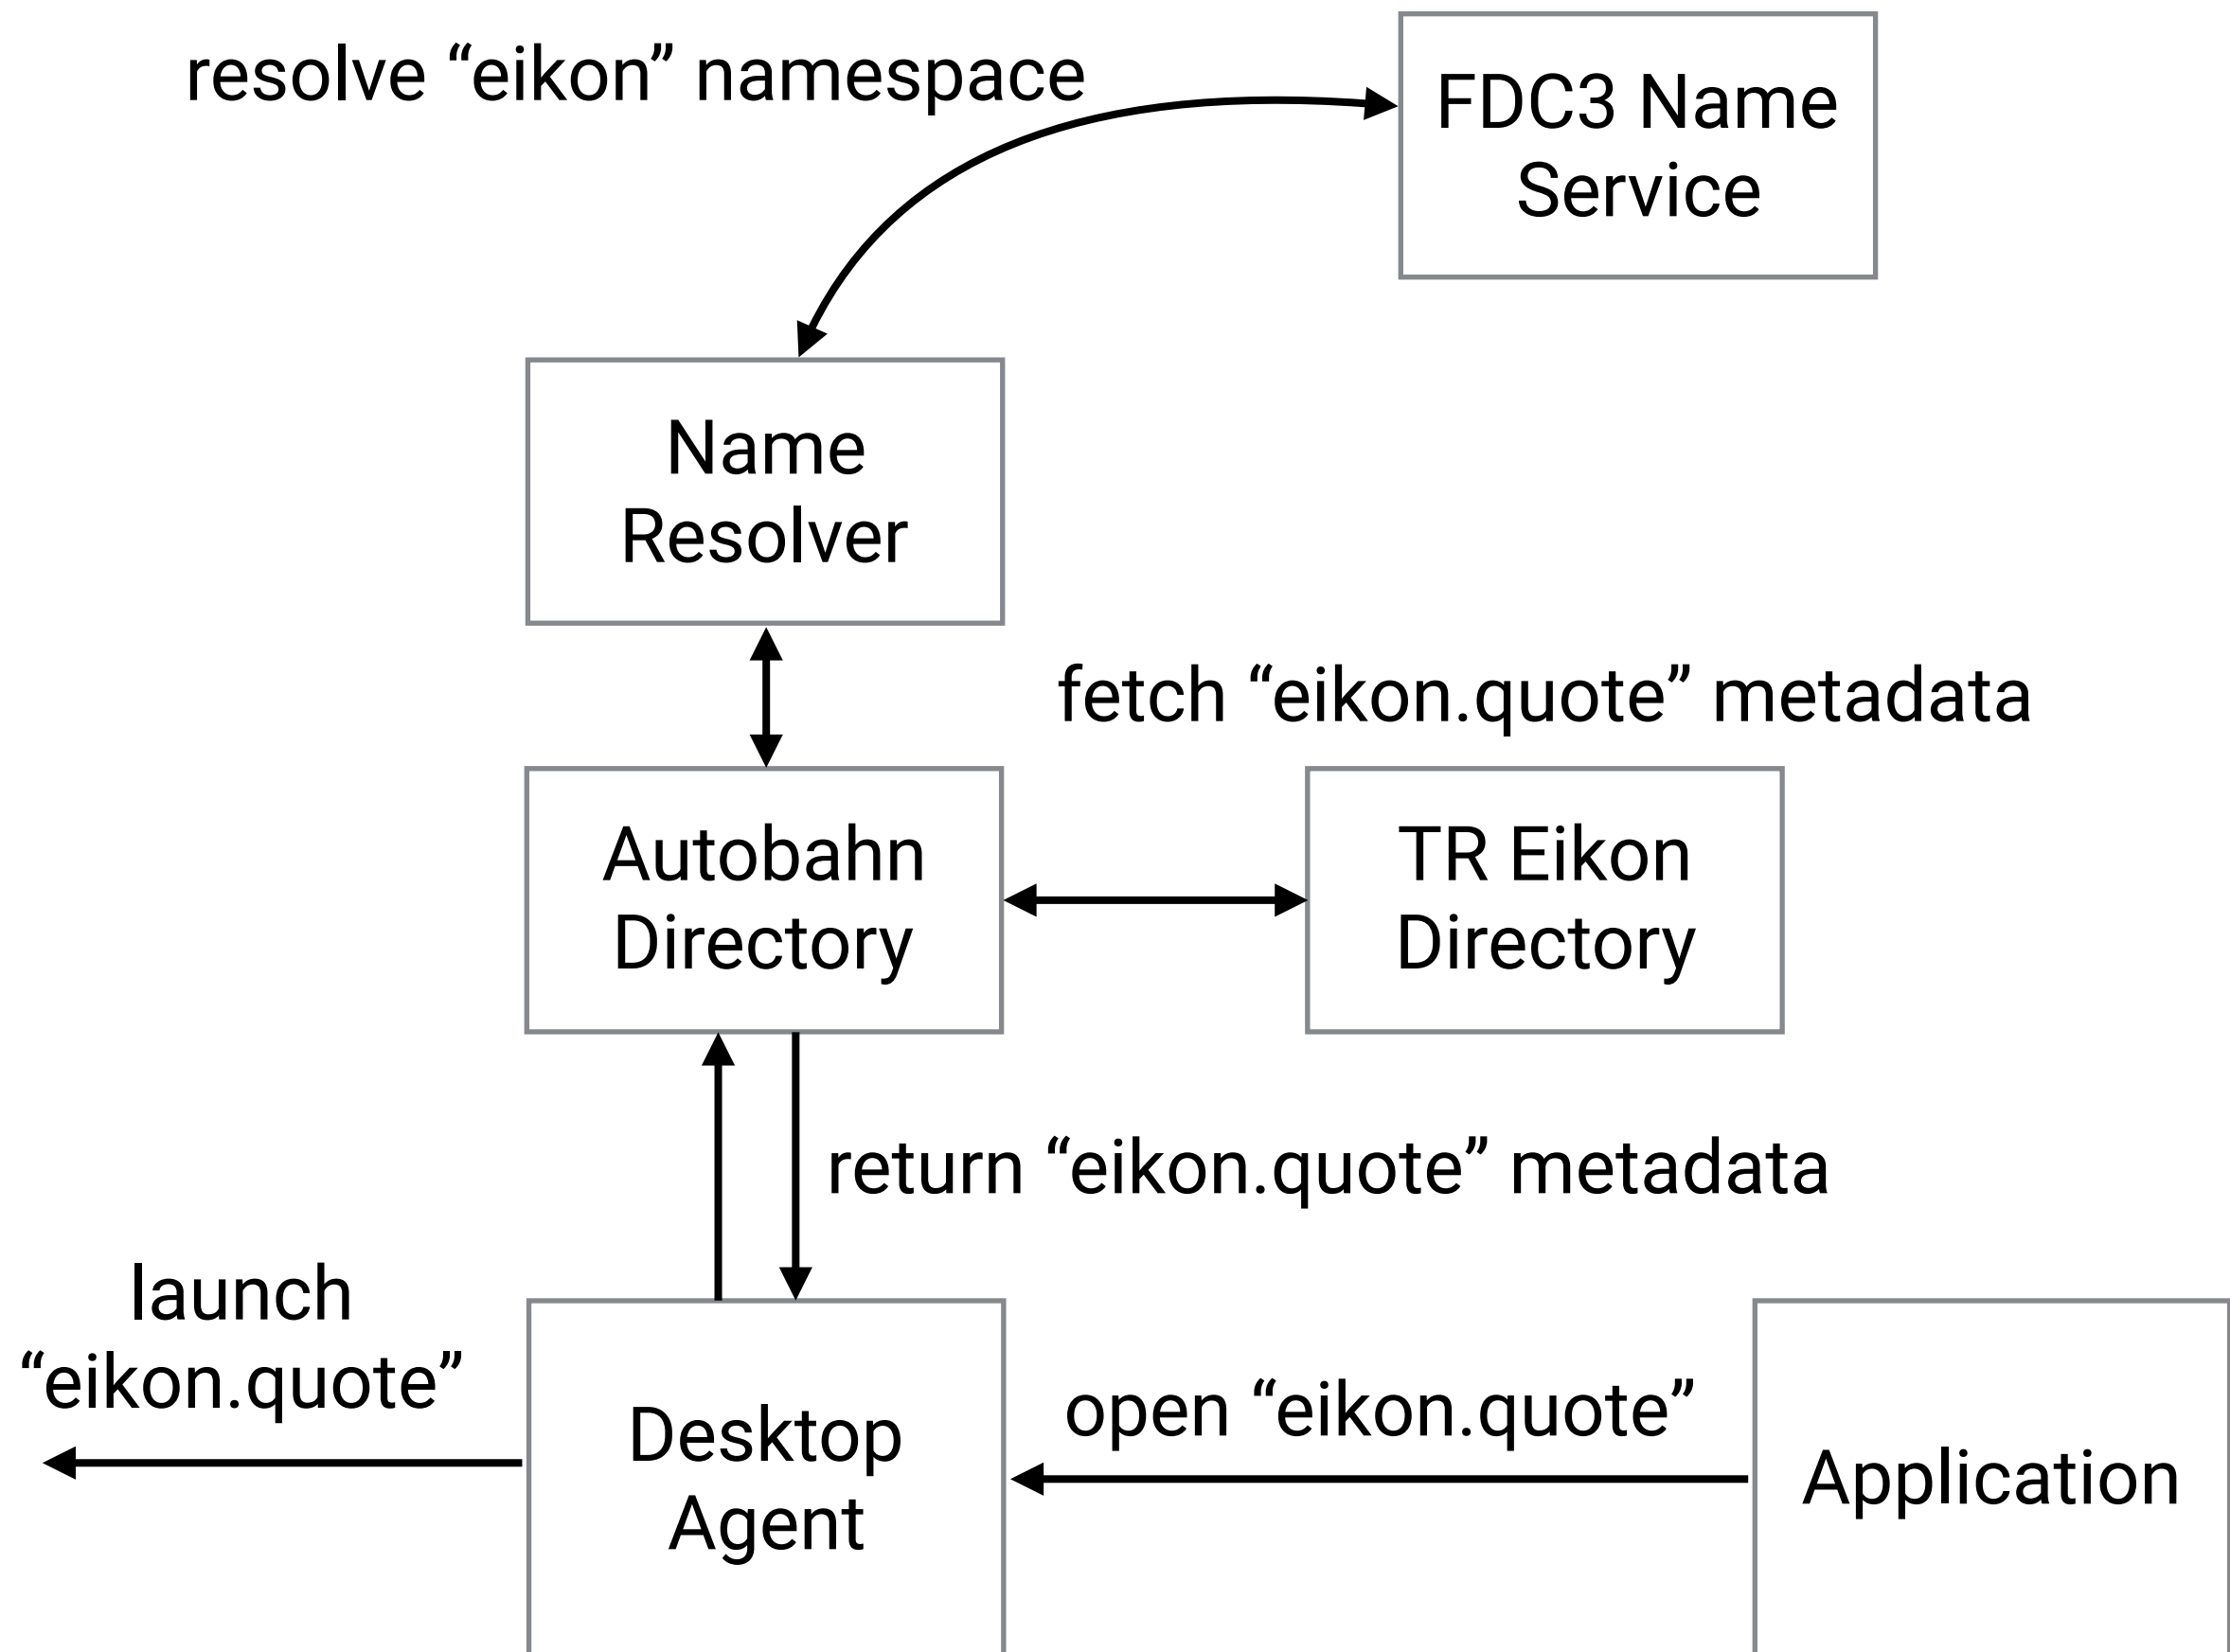

- Working Charter finalized and approved
- <https://github.com/FDC3/App-Directory/blob/master/charter.MD>
- Primary purpose of WG is App Directory standards that:
 - Provide verification of identity for desktop applications
 - Resolve human readable names for applications to the location of and instructions for launching
 - Serve as a repository for application metadata supporting discoverability by intent, context, and other workflow driven facets.

App Directory WG

- Document submitted by TR
- https://github.com/FDC3/App-Directory/blob/master/fdc3_thomsonreuters.md
- Positions/Questions raised by TR Eikon team in response to App Directory WG discussions

App Directory WG

- Main decision points of consensus
 - Directories would federate via Name Services
 - Agents combine concept of Broker and Launcher
 - Addressed through URL using agent-specific protocol
 - *fins://... symphony://...* etc
 - Knows how to launch Apps and route msgs in its domain
- App Manifest standard is out of scope for App Directory

Intents WG

- On-going discussion around scope
- To what extent should standards define RPC?
- Is RPC in scope for Intents WG? Does it belong in a separate WG?

GreenKey Demo

- GK: Audio transcription & translation
- Converts Commands to Structured JSON
- Translate Commands to FDC3 Intents & Context Data
- <https://www.greenkeytech.com/sales/openfin-skills/>

Savanet Contribution Proposal

- Savanet is interested in contributing their financial data taxonomy to FDC3
- Questions for contributions:
 - Does this make sense / and be used as a standard?
 - Would this promote interoperability?
 - Is this maintainable/sustainable within FDC3?
